

Why MedTrait® precision medication management is needed

Today's healthcare providers face a constant challenge.

Effective prescribing is a complex problem with many variables.

 Genetic considerations

 Comorbidities

 Drug-drug interactions

 Scientific updates

 Lifestyle and nutrition

 Race, age, gender

 Duplicate therapies

 Medication cost

 Base drug risk

 Likelihood of success

What's the risk?

- Adverse drug reactions
- Drug non-efficacy
- Duplicate therapy
- Failed treatment
- Overmedication
- Unnecessary costs
- Non-compliance
- Hospitalizations

 MedTrait®

is the all-inclusive solution for complete precision medication management.

 Comprehensively considers multiple prescribing factors in real time

 Evaluates whole-patient care, including mental health, cardiology, pain management and poly-pharmacy

 Strong scientific integrity and transparency in every genetic interpretation

 Quick and easy guidance that can be evaluated within seconds

 One-time test with lifetime benefits for immediate and future utility

Who benefits?

- Poly-pharmacy patients
- Mental health
- Cardiology
- Pain management
- New treatment regimen
- Complicated treatment
- Pre-surgery
- OB/GYN

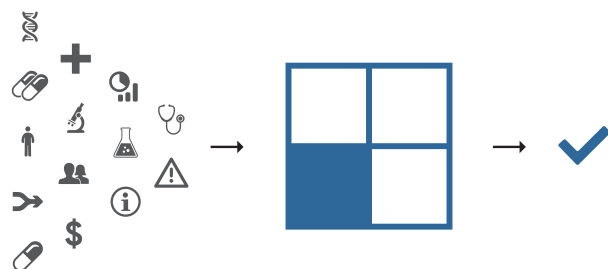

*EMR integration varies by provider. Resting APIs available.

What's different vs other PGx testing options?

-  Personalized prescribing guidance beyond genetics including drug interactions, demographics, duplicate therapy considerations
-  Whole-patient clinical utility for all areas of patient care vs isolated focus within a single specialty area
-  High scientific integrity and transparency vs questionable sources and validity
-  Quick, flexible and easy-to-use formats for providers vs complicated and cumbersome information delivery methods
-  ADR risk and non-efficacy risk independently evaluated vs quantifying risk as a linear metric
-  Valuable for life with combined PDF report and online tool vs single-use static reports

With MedTrait, targeted prescribing is always quick, simple and accurate.
